This document is maintained by the MFID Assignments Administrator appointed by the TR-8.15 Common Air Interface subcommittee and is provided for informational purposes.

The table below provides a summary of the Manufacturer's Identifier (MFID) value assignments as of the date shown below. The "MFID" column shows the hexadecimal MFID value and the "Organization" column shows the name or abbreviated name of the organization assigned to the MFID value. A superscript number following the organization name indicates there is more information regarding the organization in an equivalently numbered note following the table. For example, the note may simply provide the full name of the organization (if it was abbreviated in the table) and/or provide a history of organization name changes as appropriate.

To request an MFID assignment for your organization or to modify your organization name information for an existing MFID assignment, contact the TR-8 Mobile and Personal Private Radio Standards engineering committee leadership. Contact information for current TR-8 engineering committee leadership is available on the Telecommunications Industry Association (TIA) website. As of the date shown below, the TIA website URL is www.tiaonline.org.   Once on the TIA website home page, click on "STANDARDS", then click on "TIA Engineering Committees", then click on "TR-8".

Current TR-8 engineering committee leadership will forward your request to the current TR-8.15 subcommittee leadership who will then notify the current MFID Assignments Administrator. The MFID Assignments Administrator will contact you if any additional information or clarification is needed and notify you once the requested MFID has been assigned or the requested changes for a current MFID assignment have been made.
