### 1.5. TIA Intellectual Property Rights (Early Disclosure Policy)

The Chair brought to the attention of the attendees the TIA policy regarding intellectual property rights:

TIA's Intellectual Property Rights Policy can be found in Statements of Policy (ANNEX C) and other clauses and annexes of TIA Standards Development Procedures. Participants in the work of the TIA Formulating Groups are urged to review the appropriate sections. Individual participants are encouraged to notify TIA of any patent(s) or published pending patent application(s) of which they are aware that may be essential to the practice of a proposed TIA Publication, including requirements introduced through normative references, early on in the development to reduce the possibility for delays in the development process and increase the likelihood that the proposed TIA Publication will become a Standard. However, a Patent Holder who has provided TIA with a TIA Patent Holder Statement with respect to the applicable proposed TIA Publication need not (but may elect to) identify its specific patent(s) or published pending patent application(s) that may be essential to the practice of the proposed TIA Publication in question. Patent searches are not required to comply with the TIA Intellectual Property Rights Policy.

## Meeting Report

### 1.7. Chair's Report and General Items

Use the TIA cover sheets for contributions. Cover sheets are not needed for balloted drafts, ballot results, or comment compilations. Request a document number from chair and place on cover sheet.

TR-42 has transitioned to TIA Connect for meeting administration and messaging and we will no longer be able to upload documents to the TIA FTP site. You will be able to retrieve old documents, but now documents will be uploaded to TIA Connect

<https://connect.tiaonline.org/home>.

Please also note that the "reflector" email distribution has changed: Old: [tr4212@tiacomm.org](mailto:tr4212@tiacomm.org)  
New: [TIA-TR4212@ConnectedCommunity.org](mailto:TIA-TR4212@ConnectedCommunity.org)

Voting registration policy: three non-returned ballots will place member in the "register by document" status instead of "automatic registration" status. This is being implemented to provide a mechanism to demote the people who are auto registered but do not participate in meetings or ballots that sometimes cause insufficient return rates to allow ballot closure.

### 1.8. List of Standards and TSBs from Subcommittee

Please reference the tracking spreadsheet located in TIAConnect TR42.12 workspace (TR42.12-2023-01-002\_v2.0\_MasterDoc.xlsx).

### 1.9. Liaison letters received

None

Note: MOU on FOTPs from ICEA was received and forwarded to Henry Franc

### 1.10. Reports

TR42.12-2023-01-004	David Kozischek	Corning	ICEA Report

## 2. FOTPs and Specifications working session

Review TR42.12-2023-01-002 (Master document list of FOTPs and Specs) then:

- Sort them by date, so we know which are out of date.
- Tag them to determine which ones can be adopted/reaffirmed without change.
- Tag any that are no longer needed, they can be rescinded and are equally easy.
- Then any that need to be adapted/updated/revise set up a priority list and ask for editors to take ownership.
- Regardless all actions; reaffirm/rescind/revise all need to go through the ballot process.

**Action #1:** Chair and Vice-chair will take action to review all documents on the Master sheet and come back in June 2023 with recommendations on the next batch of documents to work on. Comments from other 42.12 members are encouraged; please send any notes to Dave and Roman.

## 3. Old Business

## Meeting Report

### 3.1. TIA-455-3 (FOTP-3) Temperature Ramps and Precision (Editor: Roman Shubochkin, OFS)

October Update: PAF has been submitted but has not gone through for editorial comments

January Update: Unfortunately, looking into this further, we missed the deadline to submit this for publication per ANSI requirements. The public review for the ballot ended on July 12, 2021 and the BSR9 would have needed to be submitted by July 12, 2022 in order to be compliant with ANSI.

So, we should vote 1) put the document for the re-ballot after the meeting this week and 2) if it passes w/o technical objections, then it can go to publication automatically; there is no need to re-submit the paperwork. If there are no technical comments, then we can publish in April; Roman will submit the ballot form.

**Motion #4:** Move to put document in for re-ballot after Jan 2023 meeting and publish it if there are no technical objections.

Moved: Roman Shubochkin Second: Dan Morris Result: Passed without objection

### 3.2. TIA-455-111-B (11/2003) (FOTP-111), fiber curl, adoption of IEC 60793-1-34 (editor Phil Irwin, Panduit)
