Note 1: The applicable patent policy can be found in the TIA Engineering Committee Operating Procedures. Participants in the work of a TIA Formulating Group are urged to review this policy. Participants are encouraged to notify TIA of any patents of which they are aware that are related to the practice of a TIA publication early on in the development of the TIA publication to reduce the possibility for delays in the development process and to increase the likelihood that the draft TIA document will be approved for publication. Patent searches are not required to comply with the TIA IPR policy. Moreover, the TIA Engineering Committee Operating Procedures describe the need for members' disclosure of patents that are essential to practice TIA publications and for members to provide an indication of their willingness to license any known patents.
